

The transcription and translation infrastructure behind tier-one expert networks.

Specialist language services for the AI era of expert networks and financial data — built on six years of human-in-the-loop AI inside the world's most demanding finance workflows.

IN ONE PARAGRAPH

INFLXD was founded in 2019 as an AI consultancy and has since focused exclusively on the expert network and financial data space. Today we run the transcription, translation, and AI dataset layer behind several of the top tier-one ENs — and the financial intelligence platforms working alongside them — including the AI-moderated call workflows the industry is moving toward.

WHAT WE DO

/ 01

01

Expert call transcription

Direct calls and primary research at 99.9% accuracy. Multi-speaker, multi-accent, finance-trained. Real-time live, AI async <10 min, express HITL <4 hr, standard <24 hr.

02

Transcript libraries & AI datasets

Capacity to deliver 10,000+ audio hours per month per partner, structured into AI-ready datasets for search, analytics, and Gen AI retrieval inside EN platforms.

03

Multilingual & translation

Native transcription and translation across Mandarin, Japanese, Korean, French, Spanish, German, Italian and more — including code-switching, which no other vendor handles at scale.

04

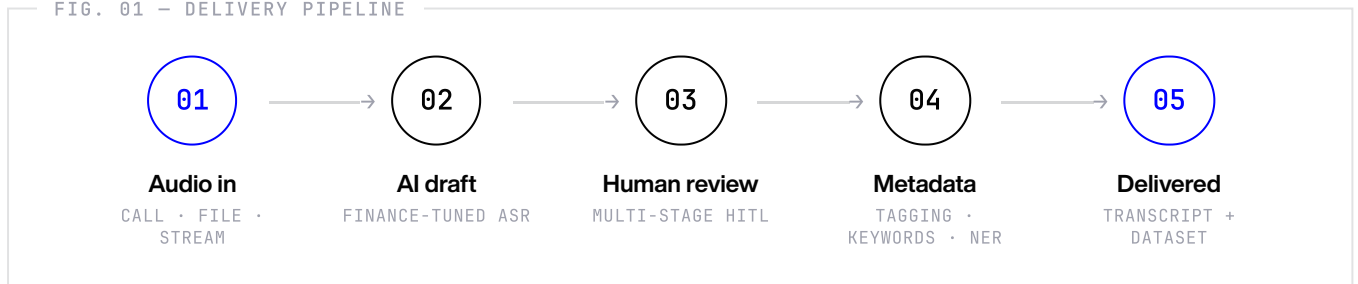

Compliance & AI advisory

MNPI flagging augmentation, Compliance Co-Pilot, and the real-time Compliance Chaperone. Plus advisory on ontology, NER, AI-moderated calls, and sourcing automation.

HOW IT FLOWS

/ 02

FIG. 01 - DELIVERY PIPELINE

WHO WE WORK WITH

/ 03

Working with INFLXD has been a game changer for our business — the team has been supportive, responsive, and reliable at each step of the way. From being active collaborators during technical implementation, to ramping to our transcription needs in the course of weeks, to providing high quality ongoing service, INFLXD has continually showed up as a value-add partner rather than just another vendor in our stack.

LEADING TIER-1 EXPERT NETWORK · PARTNER UNDER NDA

PARTNERS COVERED UNDER NDA — REFERENCES AVAILABLE ON REQUEST.

2 OF TOP 4 TIER-1 ENS PARTNERED

■ WHY WE'RE BUILT FOR THIS

/ 04

A – SPECIALIST

Specialist, not generalist

Six years exclusively inside expert networks and financial audio. We don't service legal, medical, or media on the side. The entire system is tuned to one industry.

B – OPERATIONS + AI

Operations + AI bench

The only vendor pairing managed delivery with a real technical and AI consulting team — which is why bigger ENs use us not just for cost, but for proprietary AI datasets too.

C – FINANCE-GRADE

Built for high-stakes finance audio

Six years processing the most demanding finance audio — buy-side calls, primary research, multi-accent multi-speaker, MNPI-sensitive material. Where accuracy and turnaround are not negotiable.

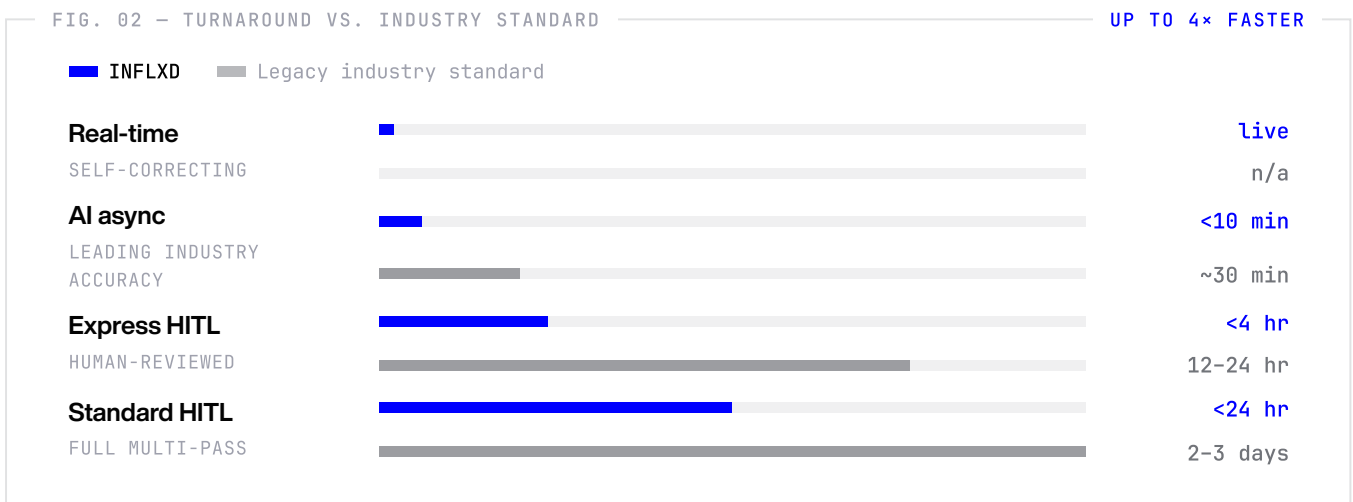

■ BY THE NUMBERS

/ 05

| | | | |
|--|---|--|--|
| <p>99.9%</p> <p>Accuracy across multi-stage human review.</p> | <p>Up to 4x</p> <p>Faster turnaround vs. legacy vendors.</p> | <p>10,000+</p> <p>Hour/month capacity ready for a single partner.</p> | <p>20-30%</p> <p>Cost reduction vs. legacy workflows.</p> |
|--|---|--|--|

■ TURNAROUND
